NIHALA P

Data Analyst

Calicut, Kerala | 9895480357 | nihalanil666@gmail.com | linkedin.com/in/nihala-p

PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate and Data Analyst Intern with a strong foundation in SQL, built through database coursework and hands-on college projects, along with Python and Excel. Experienced in gathering, cleaning and analysing data and building Power BI dashboards that turn key metrics into actionable insights. Detail-oriented and analytical, with a keen interest in data analysis.

TECHNICAL SKILLS

- **Databases & SQL:** MySQL, SQL, relational database design, data cleaning and validation
- **Programming:** Python (Pandas, NumPy)
- **Machine Learning:** Random Forest classification
- **Data Tools:** Microsoft Excel (PivotTables, PivotCharts, Slicers), Power BI (Power Query, DAX), Tableau
- **Visualization:** Matplotlib, Seaborn
- **Web:** HTML, CSS

EXPERIENCE

Data Analyst Intern | Techolas Technologies Private Limited, Calicut, Kerala | *April 2026 – Present*

- Gathered, cleaned and validated datasets using SQL, Excel and Python to keep data accurate and consistent for business decisions
- Worked with team members to improve data quality and streamline reporting workflows
- Designed and delivered Power BI dashboards that turned key metrics into clear, actionable insights

EDUCATION

Bachelor of Science in Computer Science | 2023 – 2026
NMSM Govt College Kalpetta, University of Calicut

PROJECTS

Employee Database Management System | *MySQL · SQL*

- Designed a relational MySQL database of departments and employees, using primary and foreign keys and constraints (UNIQUE, NOT NULL, CHECK) to keep the data consistent
- Wrote SQL queries with joins, grouping, subqueries and CTEs to analyse salary and department data, and also built a view and an index and tested transactions with rollback

TerraGuard – Flood & Landslide Risk Prediction System | *Python · Flask · Random Forest · SQL*

- Built a prediction system combining weather API and geolocation data, using SQL for data storage and retrieval
- Classified locations as Safe, Low Risk or Alert to support early disaster awareness

Finance Analytics Dashboard | *Power BI · Power Query · DAX*

- Analysed financial transactions and customer details to surface transaction, customer and financial insights

Gaming Addiction & Mental Health Analysis | *Excel · PivotTables · Slicers*

- Built an interactive dashboard linking gaming habits to sleep, stress and mental health patterns

Electric Vehicle Analysis | *Tableau · Filters · Calculated Fields*

- Compared electric vehicles by features and location to identify key EV adoption trends

CERTIFICATIONS

- **Career Essentials in Generative AI** – Microsoft and LinkedIn Learning (September 2025)
